

LapJacks

The **Selecta Lapjack** was developed through a collaboration between Lapjacks and Selectamark, to address the security problems of corporate and educational laptops. The current guidelines for computer theft prevention are based around a three pronged approach.

1. Physical - Kensington Locks, Locked store cupboards etc

2. Permanent - A permanent marking that can not be removed without physically damaging the laptop and so rendering it hard or impossible to sell on.

3. Visual - A visual deterrent to alert a potential thief to the permanent marking and so preventing the theft.

The Selecta Lapjack satisfies the second two of these guidelines.

Guide to Selecta Lapjacks

	Selecta Lapjack	Selecta Lapjack LPS 1225
Surface	Textured Silk	Textured Silk
Permanent Mark	Postcode	Unique code and Selectamark Freephone number
