

Packaging

Packaging and Distribution

The quality service from Direct Corporate Design extends from the beginning of the project right through to packaging and fulfilment of your order, ensuring that your products are presented professionally.

Packaging

CDs, DVDs and Digital CD Business Cards

These can be packaged in card wallets or jewel cases, with or without inlays. For customers who need to include more information than is possible using an inlay, we will produce a two or four page insert, or a booklet. The external faces of card wallets can also be printed. All print is available in up to six colours. See our page on Specifications and Templates for further information.

3.5" Diskettes

These are usually packaged in clear plastic cases. Inserts and labels can be printed if required: we are always happy to discuss customer's project ideas.

USB Pens

The pens are packed in clear bubble wrap and cardboard to ensure they reach their destination in perfect condition.

Distribution

Our distribution team is used to handling time-critical orders. They work with national and international courier firms, which are carefully selected for their reliability and service, but we are equally happy to work with our customer using their own distribution services. Contact

the team on 01245 328 050 to discuss your own particular requirements.
